Description PA Motorsport have in stock our own version of the Hillman Imp stub axle. These stub axles have been made from superior materials to the originals and feature a RH or LH hub nut thread to stop the common problem of the hub nut coming undone. These axles are found on many Historic racing cars as well as racing Imps and our axles are a direct replacement for the originals. We can also machine these axles to suit other applications such as Crossle. Please contact info@pamotorsport.com for more details
